Pride Manufacturing Installs 5 Pieces of CNC Equipment

Equipment Added to Produce Larger Parts & Diversify Offerings

Pride Manufacturing, Liberty, Missouri, has recently installed five new pieces of CNC equipment.

The 12-year-old firm is a machining and fabricating job shop that specializes in precision CNC turning/milling, high-speed milling, grinding and weldments.

The new equipment includes: a Tsugami Swiss turning center; an Emco Meyer multi-axis robotic turning center with live tooling; a Leadwell turning center (35" x 84" capacity); a Puma 700L turning center (35" x 129" capacity) and a Zeiss CMM.

Founded in 1997 by Tom Goodpasture, a 35-year industry veteran, the firm has grown to have 30 employees working with almost 40 CNC machine tools. The firm has also survived a 2003 F4 tornado that wiped out its facility.

"This equipment enables us to produce larger parts, diversify our offerings and to keep up with the requirements of our customers," noted Goodpasture. "This also takes us to the next level as an operation. We firmly believe that top technology matched with our experienced workforce will help us

serve our customers in a superior manner."

Pride Mfg. serves such industries as: railroad, medical, food, defense, aircraft, automotive, computers and construction.

The company is ISO compliant and also offers assembly and delivery.

The company works with a wide range of materials including:

tool steel, steel, stainless, brass, copper and exotics and all types of aluminum as well as plastics (including Torlon, Ultem Ryton and Vespel).
